Our online Phlebotomy continuing education program is fully approved and accredited by the California Department of Public Health-Laboratory Field Services

We work with educators as well as authors of phlebotomy training materials to compose a quality continuing education program. Our courses will not only refresh what has been learned during the initial certification/licensure process, but also teach the latest concepts and trends as well as technology that has affected the phlebotomy industry.

The mission of Contra Costa Medical Career College is to provide today’s busy phlebotomist with approved and accredited continuing education courses on topics that are vital to current clinical practice and available anytime, anywhere. We are dedicated to providing the highest quality of continuing education available to meet the needs of California certified Phlebotomists as well as phlebotomists all over the country.

We believe that education is required for lifelong professional growth. Only through continual learning can we hope to maintain the highest level of professional excellence, meeting the needs of our patients as care givers.
